

# Managed Services

## MANAGED LAN/WAN MONITORS

Our managed LAN/WAN services provide monitoring, event management, maintenance, and support for IP enabled device endpoints on their premises. Our managed service professionals on our Operation team provide monitoring, troubleshooting, bottleneck resolution, and much more to keep your IT team focused on more important matters.

### Benefits

- Enables you to focus on revenue-producing business objectives
- Provides standard web-based reports
- Improves performance on bandwidth utilization and interface availability

## MANAGED NETWORK SECURITY

With One Ring Managed Services, we dedicate adequate resources to network security so you don't have to. While network security can be a moving target, our seasoned professionals utilize powerful security technology and highly accurate threat intelligence to provide your network the best protection. We set it up, maintain it and manage it.

### Benefits

- Includes customer premises equipment (CPE) options
- Security without the hassle so you can stop worrying about outdated equipment, hardware failure, and capital expenses

## MANAGED ROUTER

One Ring Managed Router takes over the responsibility of managing your network routers from provisioning to router configuration to installation, management and maintenance. We determine the best and most efficient paths to move your data to its destination, allowing you to spend your valuable time working.

### Benefits

- Better resource allocation and faster issue resolution
- Free up in-house IT resources for more business-critical projects
- Avoid network problems like delays, unauthorized access, and configuration errors

## MANAGED Wi-Fi SOLUTIONS

Wi-Fi monitoring support with One Ring Managed Services provides you with wireless routers installed by qualified technicians and 24/7 management to monitor your network by our Operations Center. Our team will evaluate location factors, coverage and application/user needs, including security and bandwidth to find you the best possible solution.

### Benefits

- Complete lifecycle support for customers
- For more control, One Ring will provide and install the equipment, allowing you to connect to your own infrastructure.
- Enables you to securely deliver wireless data service to every corner of your office
