

FIXED WIRELESS

BUSINESS INTERNET

We support the success of our customers daily operations by providing high-quality fixed wireless internet connections that are both reliable and secure.

TEMPORARY SERVICE

We offer temporary fixed wireless services for events, concerts, festivals, conferences and more. With an average 5-14 day installation, your event can be up and running quickly, so you won't miss a beat. This temporary service can be turned on for the duration of the event. Whether it lasts for one day or one month, you will always be connected.

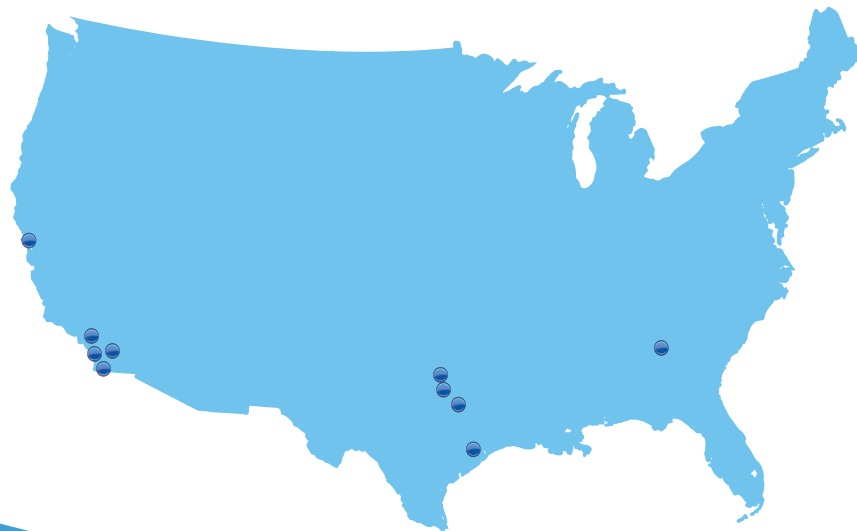

SCALABLE BANDWIDTH

Our scalable fixed wireless is fully customizable and can be scaled up and down depending on your organization's connectivity needs. We can install temporary fixed wireless while your organization waits for your fiber to be installed. In many cases, this high-speed solution is then used as a permanent backup to the primary fiber connection.

ADDITIONAL BENEFITS

- Flexible Contracts
- Fastest Installations
- Personalized Customer Support
- Temporary to Permanent Solutions
- Symmetrical Speeds of 1.5Mbps - 1GIG
- Quick Response Times
